

The Intervention Hub's Gang Awareness Hub is designed for services, including criminal justice organisations like the Police and Probation, to direct individuals suspected of gang-related activity or involvement in knife crime. By providing education on the risks and dangers of gang violence, we offer the tools needed to avoid getting drawn into these behaviours.

The Hub is separated into sessions and each session is broken down into three areas:

Knowledge – The user is presented with multi-modal information to help develop an awareness of the subject matter.

Understanding – Reinforces and assesses understanding whilst also helping practitioners identify any areas of concern or development.

New Skills – The user is offered a number of problem solving strategies and skills to make sustainable changes. They are also able to download a PDF summary of the new skill that they can use outside of the session.

GANG AWARENESS HUB AIMS

- Develop knowledge about gangs and the impact of knife crime.
- Increase their understanding of gang culture and knife crime and to motivate individuals to change.
- Learn the tools needed to desist from gang involvement and the use of knives.
